Vaccines pro and con

First of all let's define that there are pharmaceutical vaccines and homeopathic vaccines, which are called **Nosodes**.

The fear of disease should actually make all humans eat and live healthy. Nature has proven that without humans it can recover. One impressive example is Chernobyl. After the radioactive disaster it was and still is not liveable for humans. And despite the high radioactivity, plants and animals even some that were thought to be extinct, recover and co-exist in perfect harmony. What have we humans learned from that? Most people actually have learned nothing as they place their comfort over their health. Health comes by being in harmony with Nature and Nature's laws. Pharmaceuticals are designed to treat symptoms with the side effects of impacting and damaging further, but permitting people to ignore the actual cause of their disease.

Pharmaceutical vaccines have been designed to feed the fear and laziness of people despite their various negative side effects. Many neurological disorders only started existence since vaccines got introduced. Nosodes, the homeopathic vaccines are safe and support health without side effects. Like all homeopathic and natural supplements they belong into the hands of trained medical / health practitioners for correct application.

The world is alive. Life happens all around us which is why we love to live on planet earth. Our body, our surroundings, our inside exists of endless numbers of living cells, bacteria, fungi, viruses and microbes that function in coherence happily and healthy together.

Past Founder and CHA

President late Diana B. Cherry

When untouched and in harmony with nature, like in Chernobyl, balance naturally occurs. Natural cycles of renewal, evolution, growth and as well death are part of nature.

The attempt to block nature through vaccines and pharmaceuticals has proven repeatedly to only create weakened humans while nature keeps evolving. It is simply impossible on a living breathing planet to eradicate every virus and bacteria without erasing all living and life.

You have all heard about diseases being carried by insects, animals and plants, as well as by humans itself. And it has happened since thousands of years that humans survived and evolved, and the natural defence health systems in our bodies learned and defeated and got strengthened. And let's face it - death happens, all the time! It's natural and part of being a living accumulation of cells in a living world. The beauty of our experience is that we can feel, we can breathe and we are alive. We are designed to live and to die. Some live very short and some live to be over 200 years old. Why? It's nature and being in sync with nature. Key to live a happy and healthy life is to be physically active, to connect with the natural earth energy and frequencies. To understand that the less we manipulate, process or disturb nature and ourselves, the greater our potential for a happy and healthy life is. Nourishing, refuelling, rebalancing, de-stressing are the path to heal, repair, align and balance our being. Breathing love and light. Getting out of the fear and control perceptions. Health in all three dimensions of existence - physical, emotional and energetic being - through 3D-Healing.

Vaccines via pharmaceuticals will never support health and it will be impossible to eradicate life - unless we turn our planet into a dead planet - but then I recommend these people that wish to do so to simply move to the moon or to mars and leave the ones that chose life with all its beauty and challenges (that assist to learn and evolve) right here. It has been part of the world's history that few individual humans aimed to control the masses riding on deep engrained fears.

3D-Master-Healing assists in removing unwanted negative emotions, feelings, thoughts and perceptions. 3D-Healing is non-invasive, pain free, fun and the natural tool to heal, repair, align, and balance our three dimensions of being! 3D-Healing is your path to connection and function, health and happiness.

Homeopathic vaccines, natural remedies and supplements are highly recommended. 3D-Healing is inclusive of ancient and traditional healing methods in conjunction with modern medicine where applicable.

It is everyone's personal free choice to destroy the body we live in, or - to support the body and being into happy functioning balance.

Peer reviewed scientific information about homeopathy, which is scientifically proven natural nano-technology, and about nosodes is available.

It is definite fact that nosodes act on much deeper levels, which means they act on specific genes that are responsible to regulate the functions of other genes.

Every constitutional Medicine in homeopathy acts on genes and produce epigenetic modifications.

The simple difference is that homeopathy, and ancient and traditional healing methods cure (!) diseases while conventional medicine manages diseases within physiological levels - which may be an interim solution but fails in the long term and healing departments.

The above books by Prof. Dr. E.S. Rajendran MD(HOM), PhD have all the science included and are fun to read and understandable for everyone, which is why I chose to share them with you.

The following information is vastly suppressed on North American web-sources! Fortunately we speak several languages fluent and found English translations (available to the public) that we copied here with the original unedited content:

In 1796 Edward Jenner, an English country doctor from Gloucestershire, administers **the world's first vaccination** as a preventive treatment for smallpox, a disease that had killed millions of people over the centuries.

While still a medical student, Jenner noticed that milkmaids who had contracted a disease called cowpox, which caused blistering on cow's udders, did not catch smallpox. Unlike smallpox, which caused severe skin eruptions and dangerous fevers in humans, cowpox led to few ill symptoms in these women. On May 14, 1796, Jenner took fluid from a cowpox blister and scratched it into the skin of James Phipps, an eight-year-old boy. A single blister rose up on the spot, but James soon recovered. On July 1, Jenner inoculated the boy again, this time with smallpox matter, and no disease developed. The vaccine was a success. Doctors all over Europe soon adopted Jenner's innovative technique, leading to a drastic decline in new sufferers of the devastating disease.

In the 19th and 20th centuries, scientists following Jenner's model developed new vaccines to fight numerous deadly diseases, including polio, whooping cough, measles, tetanus, yellow fever, typhus, and hepatitis B, and many others.

Joseph Wilhelm Lux 1773 - 1849 MD from Leipzig, Veterinary Breslau, was a German veterinary surgeon who converted to homeopathy. Lux was a member of the Homeopathischer Zentralverein..

Lux was the founder of veterinary homeopathy alongside Ernst Ferdinand Rueckert, though later in his life he concentrated upon homeopathic isopathy.

After Constantine Hering's introduction of the nosodes, Johann Joseph Wilhelm Lux, a well known homoeopathic veterinarian, began to conduct experiments with the isopathic use of disease materials in potencies.

In December, 1831, Lux was asked if he knew any homoeopathic remedies for the treatment of bovine plague and anthrax. Lux replied that he could not suggest any remedies off hand but he offered the following suggestion. He told the person to take a drop of blood of an animal infected with anthrax, and a drop of the nasal mucous of a cow with the plague, and prepare a 30c potency of the material.

During the epidemic in 1832 many veterinarians relied on the complementary use of the nosodes and standard remedies to treat the animals under their care...

Johann Joseph Wilhelm Lux was born in Oppeln. Like Samuel Hahnemann, he was a member of the Leipziger Oekonomischen Gesellschaft (Economic Society of Leipzig).

Hering's Law

Constantine Hering was a German Homeopath who emigrated to the U.S. in the 1830's. He observed that healing occurs in a consistent pattern. He described this pattern in the form of three basic laws which homeopaths can use to recognize that healing is occurring. This pattern has been recognized by acupuncturists for hundreds of years and is also used by practitioners of herbalism and other healing disciplines.

According to the first of Hering's laws, healing progresses from the deepest part of the organism - **the mental and emotional** levels and the vital organs - to the external parts, such as skin and extremities.

Hering's second law states that, as healing progresses, symptoms appear and disappear in the reverse of their original chronological order of appearance. Homeopaths have consistently observed that their patients re-experience symptoms from past conditions.

According to Hering's third law, healing progresses from the upper to the lower parts of the body. For instance, a person is considered to be on the mend if the arthritic pain in his neck has decreased although he now has pain in his finger joints.

As the symptoms change in accordance with Hering's Law, it is common for individual symptoms to become worse than they had been before treatment. If healing is truly in progress, the patient feels stronger and generally better in spite of the aggravation. Before long, the symptoms of the aggravation pass, **and leave the person healthier on all levels.**

Hering accidentally proved the remedy Lachesis while he was triturating the Bushmasters venom in his home-laboratory in Paramaribo. He was attempting to find an improved substitute for the cowpox inoculation that Jenner was developing in Britain, which Hering felt was extremely dangerous and very heavy-handed for homeopathy. His interest and experience with snake venom led him to surmise that the saliva of a rabid dog, or powdered smallpox scabs, or any other disease products, viruses, or venom's, might be prepared in the new Hahnemannian way to give a fail-safe method of curing disease. In this manner Hering unwittingly became the first in the Isopathic movement (eventually, he also unwittingly paralyzed his right side from further self-testing or "prufung" of higher and higher attenuations of Lachesis). Hering stayed in Paramaribo for six years then emigrated to America and settled in Philadelphia in 1833.

In 1848 he chartered the Hahnemann Medical College of Pennsylvania which is still considered to be one of greatest homeopathic teaching institutions of all time (next to Kents Post Graduate School) and devised the Homoeopathic Domestic Kit. There Hering and his students treated over 50,000 patients a year and trained a total of 3500 homeopaths.

Hering began organizing his voluminous notes into his still popular classic *The Guiding Symptoms of Our Materia Medica* the year before he died, in 1879, and it was completed by his students and published posthumously in 1891.

Hering was the first to use nitroglycerine in medicine for headaches and heart problems (30 years before its first use in orthodox medicine). It is an irony that he himself suddenly died one evening of a heart attack after returning from a house call to a patient. This was on the 23rd June, 1880.

Constantine Hering is widely known as "The Father of American Homeopathy" and was profoundly revered by his contemporaries. His influence extended across the larger part of the USA for the best part of the 19th century with the result that homoeopathy flourished in that country for about 70 years. The motto he carried throughout his life was, "The force of gentleness is great."

Your Health is our passion

Optimize your immune system

Times like this remind us that there is nothing more important than focusing on a healthy immune system as the real protection against any virus or bacteria. The basis of a healthy immune system is a healthy nervous system, a balanced energetic system, balanced emotions, and low stress. Removal of preexisting trauma to allow a balanced emotional and energetic state is usually one of the first things to do besides making sure to eat healthy and natural foods so you have all the required minerals, vitamins and a good pH balance in the body.

A remote NES scan is in my opinion a perfect way to start. It's one of the best and cutting edge assessment tools available to show the priorities to focus on in order to achieve and maintain a healthy and balanced state. Find out about energetic blockages, energetic immunity, emotional state, subconscious beliefs and patterns, digestion and metabolism, vitamin fields and much more in just a few seconds. The scan combined with a 3-D or hypnosis session allows to focus on the priorities of the client to achieve the best possible change.

Get well - Stay well!

Hypnosis Reality:

Part I: Tin foil hats back then and today

Do you remember - or have you heard about - the good old days in the 60s and 70s, where folks did run around with tin foil hats, in order to protect themselves towards “radiation and frequencies”....and everyone had a nice giggle on that? A little later the general concern was to get electronic chips implanted into the human body.... and yes, there was a guy named George Orwell 1984, who had his own views and predictions on the future....

Well, it turns out, those folks might have had a point?

What we see here today in April, 2020 is quite extraordinary. Some individuals really managed to get a global system change underway.... all cosmic light workers were waiting for ... with the big transition into the 5th dimension...but it turns out to be way different than hoped or expected for!

Reality CHECK: It's simply not enough to send love and light around with good intentions. Universal driven ACTION is required, since we can see and measure the performed efficiency of global mass hypnosis technology.

Like it or not, in order to survive, it's time to perhaps really team up on certain elevated vibrations?

As we know, the “mental” coronavirus spread earlier, faster and much more powerfully than its counterpart. Covid-19 began to make headlines and people **suddenly found** an “objective” justification for the fear and despair, which had been **previously programmed**, gathering unconsciously within the global population for a long time. The feedback loop between the hourly onslaught of fear-inducing headlines in the media and the growing anxious expectations in people's minds trapped humanity in a vicious neurotic cycle....with an actually funny feedback programming of the global toilet paper frenzy. Every new “case” in our neighbourhood or region, every cough from somebody, every stranger coming too close doubled-down on an eerie sense of ubiquitous danger. As more and more info is surfacing, such as an interview with Dr. Rashid Buttar (<https://www.youtube.com/watch?v=WGbYHJcMbz8>) it is time to get proactive and step up.

Let's face it..... whoever is in charge, orchestrating it.... It's simply genius on all levels :):)

Here is my question to the CHA membership:

Are you ready to step up and really team up, no EGO, being focused on the BIG PICTUREand being able to connect the Quantum Field dots??

The possible alternative is to get a chip implanted, line up for social credits...you pick and choose...

Hypnosis Reality:

Part II: CHA role and Mandate especially in times like that

In times like that the true colours of mindsets are coming to the surface, dysfunctional structures fall apart and- professional skill sets are more important than ever. Dissociation from the clinical created global drama is key for moving forward. Connecting to the Quantum Field is essential. Keeping the individual vibration up is mandatory. To quote our beloved teacher and mentor, late Diana B. Cherry again:
“Isn’t THAT all interesting?”

After a couple of weeks of isolation and lock down we receive on a daily basis new CHA membership inquiries galore.....which, in the first glance should be a good thing - right?

WRONG....what we are seeing is a new global batch of online graduates who got some basic knowledge in trance states, feeling ready and enabled to enlighten the world around them, including performing Quantum entanglement distance worknot even having a single clue on what kind of frequencies they’re surfing....and where they can tap into....

Having some time on hand, in many application cases over the last 5 weeks I did a 10 - 15 minute vetting via Skype or other technology means, in order to find out what level of knowledge was gained, acquired

As a proud and polite Canadian elected Society President, a Law abiding Citizen, a Quantum Field connected humble servant....I simply cannot resist to quote the following CHA mission statement :

- 1. The Canadian Hypnosis Association (CHA) mandate within Canada's Society is to promote and govern the Art and the Science of Hypnosis by providing direction, sharing of ancient teachings of the highest quality, and inspiration to those, who wish to practice the Art of Hypnosis for personal improvement or in the clinical setting. It is the mandate and goal of the Association to review and examine each Practitioner and to provide and govern strong moral guidelines and support, placing the client first and the Practitioner second. Therefore schools and practitioners undergo a thorough review by CHA to educate and practice to highest quality standards possible.**
- 2. The Canadian Hypnosis Association has the capacity, skill set and knowledge to promote and support the Art and Science of Hypnosis in the clinical setting throughout all levels of Society. It's mandate is to provide education of the highest quality, collaboration with other Associations and Government agencies, ethical direction and a philosophy of focused and quality controlled Art of Hypnosis client care.**

In consequence the Society's mandate to vet educational bodies for the following base standards: Classroom - teacher ratio, in class hands-on in every point of teaching content, curriculum content and exam content and requirements.

3. The Canadian Hypnosis Association is a for decades active, self supporting long time registered association of Master Clinical Hypnotists, Certified Practitioners of Hypnosis, students and International students in the Art and Science of Hypnosis. Its philosophy is to provide a venue of self discovery and self healing based on focused client care. The process of Hypnosis is an Art and it is based on years of scientific work by such great leaders in the field as Milton Erickson, Carl Jung, Di Cherrie, Dave Ellman and others. Its goal is to provide education of the highest quality, current research and discovery, and a governing body of elected Board Members.

To conclude and summarize:

In the past I bitched quite a bit in public about cooperations like “Hasbro” company, still producing the Ouija Board... and knowing about it’s dangers.....

As stated in Part I..... at the end of the day we should consider the idea of getting into a global shift which might look a bit different then everyone was praying for ...

As stated before, it’s time to act NOW.....

I got already a solid plan of action for myself and my loved ones, directly from Universe / Source (“they” even send updates)do YOU?

In love and light
